PREFACE

Survey Approach

The mountain lion hunting, harvest, and chase survey was conducted in two phases for 1990-1991. A mountain lion hunting, harvest, and chase questionnaire was mailed to all 1990 mountain lion license holders at the end of the hunting or chase season Sep. 15, 1990 through Feb. 15, 1991. Questionnaires for the hunting or chase season were returned from 1,012 (55%) of the 1,844 people who purchased a mountain lion license. A mountain lion chase questionnaire was mailed to all 1990 mountain lion license holders at the end of the chase only season Feb. 16, 1991 through Apr. 30, 1991. Questionnaires for the chase only season were returned from 794 (43%) of the 1,844 people who purchased a mountain lion license. Expanded estimates of hunting, harvest and chase activities were made from the returned sample. Frequency distributions were calculated for answers to the hunting and harvest questions.

Definitions

TOTAL WHO HUNTED.....Total number who hunted lions whether or not they also completed any chase questions

TOTAL WHO HUNTED ONLY.....Total number who hunted lions but did not complete any chase questions

TOTAL WHO CHASED.....Total number who chased lions whether or not they also hunted lions

TOTAL WHO CHASED ONLY.....Total number who chased lions but did not hunt lions

TOTAL WHO HUNTED OR CHASED...Total number who did something; hunted and/or chased lions

TOTAL WHO HUNTED AND CHASED..Total number who did both; hunted and chased lions

Explanations

The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the unknown categories given in the report. Chase activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.

All estimates represented are rounded to the nearest whole number. It is for this reason that sums calcualted from the report do not always agree exactly with the totals given.

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1990-1991 TRAPPING AND FUR HARVEST REPORT

JUNE 30, 1991

PREFACE

Survey Approach

A trapping and fur harvest questionnaire was mailed to all resident and nonresident Trapper license holders. Questionnaires were returned from 907 (52%) of the 1,736 people who purchased a trapper license during the 1990-1991 trapping season. Expanded estimates of trapping and harvest activities were made from the returned sample.

Definitions

MEAN CATCH.....Total catch divided by number of trappers
MEAN EFFORT.....Total trap days divided by number of trappers
PERCENT COMPOSITION...Catch for each species divided by total catch for all species and multiplied by 100
TRAPPER DAYS.....Total number of days trappers had one or more traps set

Explanations

The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

Questionnaire response data with missing or invalid trapping district information was still used in the analysis and is indicated with "X" characters in the report (eg. "3XX" indicates an invalid district within Region 3, and "XXX" indicates an unknown or invalid region).

Deer, elk, bear, and lion hunting districts were used in the analysis for the first time beginning with the license year 1989 report. Previous reports used trapping districts which have been discontinued.

In order for your Department of Fish, Wildlife and Parks to properly manage fur animals, we need information on the amount of your fur harvest, methods of harvest, and amount of trapping effort. Even if you DID NOT trap, it is IMPORTANT that you so indicate and return this questionnaire within four weeks. Thank You !
